

PHTY90091 Cardiorespiratory Physiotherapy 1

Credit Points:	12.5
Level:	9 (Graduate/Postgraduate)
Dates & Locations:	<p>2016, Parkville</p> <p>This subject commences in the following study period/s: July, Parkville - Taught on campus.</p>
Time Commitment:	Contact Hours: 90 hours lectures, tutorials, practical classes and clinics across a 17 week semester including 2 weeks of clinics. Total Time Commitment: 180 hours.
Prerequisites:	None
Corequisites:	None
Recommended Background Knowledge:	None
Non Allowed Subjects:	None
Core Participation Requirements:	<p><p>For the purposes of considering request for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005), and Student Support and Engagement Policy, academic requirements for this subject are articulated in the Subject Overview, Learning Outcomes, Assessment and Generic Skills sections of this entry.</p> <p>It is University policy to take all reasonable steps to minimise the impact of disability upon academic study, and reasonable adjustments will be made to enhance a student's participation in the University's programs. Students who feel their disability may impact on meeting the requirements of this subject are encouraged to discuss this matter with a Faculty Student Adviser and Student Equity and Disability Support: http://services.unimelb.edu.au/disability</p></p>
Coordinator:	Dr Selina Parry

Subject Overview:	<p>This subject will apply a problem based approach to describe the physiotherapy management of individuals with acute and chronic cardiorespiratory conditions. Students will integrate prior knowledge of anatomy, physiology, pharmacology and pathology with theoretical and evidence based knowledge to generate an effective and comprehensive physiotherapy management plan. A variety of teaching methods will be employed to develop students' skills in the assessment and diagnosis of cardiorespiratory problems. A range of cardiorespiratory physiotherapy interventions will be introduced and students will be trained in the appropriate execution of these techniques and relevant outcome measures to evaluate their efficacy. Consideration will also be given to the rights of individuals and the impact of team management processes in cardiorespiratory physiotherapy practice.</p>
Learning Outcomes:	<p>Element 1: Physiotherapy Theory and Practice</p> <ul style="list-style-type: none"> # Apply knowledge of pathophysiology and anatomy to justify the choice of assessment techniques and generate an appropriate physiotherapy management plan for patients with cardiorespiratory problems. # Propose, justify and demonstrate safe and effective physiotherapy interventions to manage individuals with cardiorespiratory problems. # Evaluate and analyse current research knowledge in the selection and justification of assessment techniques, clinical reasoning and management of patients with cardiorespiratory problems. # Demonstrate professional attributes including good communication, active engagement through questioning and seeking information. <p>Element 2: Evidence in Physiotherapy</p> <ul style="list-style-type: none"> # Integrate physiotherapy assessment findings to estimate risk of pulmonary complications following major surgery.

	<ul style="list-style-type: none"> # Differentiate between incidence and prevalence of common acute and chronic cardiorespiratory conditions. <p>Element 3: Health in Context</p> <ul style="list-style-type: none"> # Identify the factors that may impact on an individual's perception of participation restriction, activity limitations and impairment in the area of cardiorespiratory physiotherapy practice. # Discuss the role of the physiotherapist and other multidisciplinary team members in working with individuals with cardiorespiratory conditions.
Assessment:	Portfolio - Critical Perspective in Physiotherapy 1500 words (due mid-semester) - 25% 2-hour written examination (at the end of semester) - 45% OSCE practical skills examination (at end of semester) - 30% Attendance of >95% of practical skills classes - Hurdle
Prescribed Texts:	Pryor JA and Prasad SA (2008): Physiotherapy for respiratory and Cardiac Problems. 4 th ed. Edinburgh: Churchill Livingstone Elsevier.
Recommended Texts:	None
Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	<p>By the completion of this subject, students will have had the opportunity to develop the following generic skills:</p> <ul style="list-style-type: none"> # The application of new research data to problem-solve in clinical cases; # Clinical reasoning and decision making as applied to practice; # Communication skills with an awareness of how these may affect their interactions.
